RE: Equalized Value - October 2009
DATE: October 21, 2009

I am reporting that the district's value is just over \$2.18 billion and represents an increase of 0.18% over last year's value.

Attached is our October 2009 "School District Tax Apportionment Equalized Values." For the purpose of apportioning tax levy to municipalities, school districts use the TIDOUT Equalized Value. TIDOUT means that the growth values of tax incremental finance districts (TID) have been subtracted. The column of data labeled Computer Aid Values is used to identify the values of computer property that is excluded from property tax. Subsequently, the property tax lost is replaced by the state in the form of a direct computer aid payment in the equivalent dollar amount.
